

# Wish you 2018 be full of happiness and success!!

## BIG 5

*Change is necessary & inevitable. I direct them towards my passion. With 1% progress a week i am better off 50% in a year. It breaks my limiting behavior & thinking.*

*I stick to the clarity i have today & it leads to where i need to be. It can evaporate if i don't work on it and much of external inputs can dilute it. Laser focus gives remarkable results.*

*I work as if it is a pleasure. I desire what i deserve. I am surrounded by those amazing people who emulate same spirit & aspire success right way.*

*I systemize my efforts. It scales up rightly, smoothly & enormously. I daily follow up on my musts. I am what i repeatedly do. My schedules reveals it.*

*I thank nature for bestowing me its beautiful gifts; and for artistically enhancing it and for making it distribute boldly.*
